Allianz Insurance plc | Engineering

*"We're responsive, accessible and have a team of approximately 500 engineer surveyors across the UK. Our comprehensive portfolio of solutions, suits many industries and is backed by an exemplary claims service."*

*We're a market leading insurance and inspection service provider in the UK and are committed to continuing our ambitious programme of growth. We want to be your partner of choice, and we've developed a wide portfolio of insurance solutions and inspection services to meet your clients' needs.*

Our people are highly focused, professional and passionate and want to work with you to ensure your clients receive the most appropriate solutions for their business. We pride ourselves in offering innovative engineering insurance cover, inspection services and risk engineering solutions.

Daily, businesses are faced with risks which may include health and safety issues, legislation and regulatory compliance, together with financial exposure. However, identifying the engineering risks to a business can be complex and often requires support.

With years of experience and technical expertise, we can provide a comprehensive portfolio of solutions and services. We support businesses in evaluating their engineering risks and ensure they have the most appropriate protection required for a safe working environment.

Our message is clear, by working with us, we'll provide the right level of support, service and expertise.

## *Insurance Solutions*

### **Machinery**

Plant and machinery installed at premises can be insured, either on an individual item or a blanket basis under the Machinery Options and All Machinery policies. In both instances cover excludes fire and the associated perils that are insured under your fire policy.

### **Electronics**

Two policies are available to provide protection for a wide range of computer and other electronic equipment. The Computer Policy is designed to insure computer equipment whether a stand alone personal computer, networked system or mainframe installation. The Electronic Equipment Policy is aimed at a wider range of equipment including television studio recording and broadcasting equipment, security systems and medical equipment.

### **Consequential Loss**

The risks to a business of operating plant and machinery extends beyond simply the cost of repair or replacement. Under the Machinery Business Interruption Policy, the financial consequential losses resulting from breakdown or accidental damage can be insured.

### **Contractors**

Cover is available to protect against the cost of loss or damage to machinery, contract materials and equipment involved in construction whether in transit or on site, during construction, testing, and commissioning or in the maintenance period.

Policies available are Erection All Risks for machinery and Construction All Risks for building/civil works. Under these policies constructional plant and the transit risk can be insured alongside construction. Alternatively, constructional plant and transit risks can be insured separately under Contractors Plant or Machinery Movement policies.

### *Inspection Services*

Examinations are an important part of meeting statutory, regulatory and operational requirements. We're committed to the delivery of an inspection service, which is second to none.

By working in partnership with us, your clients will receive examinations carried out by a team of engineer surveyors who are highly experienced and technically expert.

### *Special Services*

Businesses are faced with an increasing responsibility to assess the risks regarding the health and safety aspects of their operations.

Special Services products are designed to ensure that customer needs for safe and efficient plant operation are delivered in a cost effective manner through technical advice, engineering assessment and inspection services.

### Next steps

We provide a seamless and integrated service with Allianz Commercial. We want to make it easy for you to do business with us, so having our teams located throughout the UK, means we're able to provide the local support you need.
