

Allianz Engineering Inspection Services Ltd

Health & Safety Services

Product Information

Allianz 

Health & Safety Services

In recent years there has been an increased focus on health and safety aspects in the workplace. At Allianz we are able to offer specialist, industry bespoke services, to assist with the regulations.

Requirements and Duties

The regulatory aspect falls primarily the Health & Safety at Work Act. This in turn is covered by numerous individual regulations covering health and safety in the workplace.

Health & Safety Web Portal

Allianz Engineering are able to set up for you a bespoke, industry specific Web Portal to assist with your legal obligations. The Portal will provide you with a wealth of information and a range of resource materials at the press of a button. The Portal comprises of Health & Safety, Employment Law, and Business Continuity Planning. You will have access to:

- Helpline for expert support
- Self-assessed gap analysis
- Information, guidance, policies & procedures
- Risk assessments
- eLearning training courses
- Online safety shop and bookstore
- Online document and record storage.

Audit / Risk Assessment

The completion of a health & safety audit and risk assessments will enable the current level of compliance against the relevant legislation to be assessed. They will assess the risk and indicate appropriate actions to ensure acceptable levels of risk for the health & safety of employees, customers, suppliers and visitors to your premises. A report will be provided with a list of actions in a prioritised format along with assistance in implementing these actions. It will also include a review of your existing documentation and a series of visual observations and inspections.

The Risk Assessments offered Include:

- Health & Safety Risk Assessment
- Health, Safety & Environmental Audit Report, including Control Of Substances Hazardous to Health (COSHH)
- Disability Access Audit Report – Equality Act 2010 and Part M Building Regulations and Best Practice
- Fire Risk Assessment
- Food Hygiene and Safety Audit Report.

Construction Design Management (CDM)

Construction Design Management (CDM) aims to add value to the management of construction projects by ensuring that the process incorporates health & safety at all stages. It is a new approach to health & safety arrangements in construction, providing a framework to ensure each stakeholder is clear on their role and responsibilities and has the necessary competence and capabilities to complete it. It will contribute to a culture which minimises accidents, incidents and delays through compliance by allowing all information and records to be accessible in one place.

How Allianz Engineering can help you

Allianz Engineering are able to offer all of the above services together with bespoke health & safety solutions through our audited and approved sub-contractors. These services can be supplied on a one off basis or part of a combined package.
